UPDATED: Submerged Acoustic Receiver Moorings in Anton Larsen Bay

As part of a study on acoustic telemetry system performance, the Alaska Department of Fish and Game, Commercial Fisheries Division, has deployed 16 moorings in Anton Larsen Bay near Kodiak. The moorings are located just south of the main entrance and at the head of the bay near the dock and boat ramp. Boaters are advised to note the mooring locations and use caution if fishing or anchoring nearby. The moorings are expected to remain submerged until mid-March 2026; however, if any floats become visible, please contact ADF&G. For additional information, please contact project biologist Andy Nault at (907) 486-1891.

Mooring	Latitude	Longitude
1	57° 51.227' N	152° 37.511' W
