Prince William Sound Salmon Fishery Announcement #6

COPPER RIVER DISTRICT: The Copper River District will remain closed to commercial drift gillnet fishing. The Copper River District will open to subsistence fishing at 7:00 am on Monday, June 8 for a 12-hour fishing period. Waters within the Chinook salmon expanded inside closure area will be **CLOSED** during this subsistence fishing period. The next commercial opening of the Copper River District is anticipated to occur on Thursday, June 11 with time and area announced by Wednesday, June 10. **Permit holders are advised that unscheduled announcements providing additional fishing opportunity based on Miles Lake sonar passage trends may occur at any time inseason.**

The **expanded** Chinook salmon inside closure area will be defined as waters north of a line connecting the following points:

<i>Point</i>	<i>Latitude</i>	<i>Longitude</i>
Steamboat North	60° 22.87' N.	145° 33.50' W.
Steamboat South	60° 22.31' N.	145° 33.50' W.
West side Pete Dahl Entrance	60° 18.89' N.	145° 30.99' W.
West end Grass Island	60° 18.30' N.	145° 28.42' W.
East end Grass Island	60° 15.24' N.	145° 17.89' W.
West end Kokenhenik Bar	60° 15.00' N.	145° 16.20' W.
East end Kokenhenik Bar	60° 13.65' N.	145° 09.46' W.
Western tip of Softuk Bar	60° 13.68' N.	145° 05.78' W.
Chinook Alternate #1	60° 13.79' N.	144° 59.09' W.
Chinook Alternate #2	60° 13.64' N.	144° 53.78' W.
Chinook Alternate #3	60° 12.64' N.	144° 40.21' W.

*Please note that the 'Coffee Creek West' point was replaced with 'Chinook Alternate #1'.

The grass bank marker line is defined in 5 AAC 24.350(1)(A) with the exception of this year's extension of the closure line across Little Softuk (**see bold font below**). This closure line is defined with the following points:

<i>Point</i>	<i>Latitude</i>	<i>Longitude</i>
Point Whitshed South	60° 26.49' N.	145° 52.86' W.
Alaganik Slough North	60° 24.65' N.	145° 36.70' W.
Pete Dahl East	60° 20.44' N.	145° 29.14' W.
West Kokenhenik	60° 14.88' N.	145° 10.01' W.
East "East Side"	60° 14.83' N.	145° 03.36' W.
Coffee Creek East	60° 14.19' N.	144° 58.01' W.
Charlie Mohr North	60° 15.15' N.	144° 56.43' W.
Martin River North	60° 15.29' N.	144° 52.52' W.
Strawberry Reef	60° 13.93' N.	144° 50.66' W.
Little Softuk	60° 13.16' N.	144° 41.38' W.

Waters north of this line, within sloughs, and in Boswell Bay within the bay (5 AAC 24.350 (1)(A)) are closed to commercial and subsistence salmon fishing during all periods.

Forecast, harvest, sonar apportionment, and fish wheels indicators of Chinook salmon abundance all suggest a potentially weak Copper River Chinook salmon run. Chinook salmon abundance in the commercial fishery peaks during the end of May through early June, and the commercial fishery is continuing to be managed conservatively to limit harvest. The new intermediate closure line is part of an effort to increase Chinook salmon inriver abundance while providing sockeye salmon harvest opportunity. This management strategy is being implemented to ensure the achievement of the 21,000–31,000 Chinook salmon sustainable escapement goal while providing fishing opportunity on more abundant sockeye salmon.

Miles Lake Sonar project apportionment data (Figure 1) indicate that the 2026 cumulative count of large Chinook salmon is low for the date. The escapement goal was met in 4 out of the last 7 years. It is too early in the run timing to determine the likelihood of meeting the goal this year. The current trend in large Chinook salmon passage does not give a clear indication of count levels at the end of sonar operation.

Cumulative sonar count through 6/5 is 82,230 fish whereas 146,795 fish would be expected by this date based on historical timing applied to the 2026 inriver goal. The 0600 count for 6/6 is 4,154 fish. Preliminary harvest estimates from the 12-hour period that occurred on Thursday, June 4 were 927 Chinook and 73,150 sockeye salmon with 368 deliveries reported. This compares to a projected harvest of 29,000 sockeye salmon for this period based on the preseason forecast. The cumulative commercial harvest to date is 3,942 Chinook and 210,876 sockeye salmon.

BERING RIVER DISTRICT: Bering River District will remain closed.

COGHILL DISTRICT: The Coghill District, excluding the Esther Subdistrict and the WNH THA and SHA, will open to commercial drift gillnet harvest for a 36-hour fishing period starting at 8:00 am on Monday, June 8. Preliminary harvest estimates from the 36-hour period that started on Monday, June 1 were 308 sockeye and 20,816 chum salmon with 139 deliveries reported. Preliminary harvest estimates from the 36-hour period that started on Thursday, June 4 were 977 sockeye and 12,526 chum salmon with 114 deliveries reported.

PWSAC requests that the Esther Subdistrict remain closed for the entirety of this 36-hour commercial fishing period to maximize entry into the SHA to achieve cost recovery goals. PWSAC recommends a 36-hour fishing time in the Granite Bay Subdistrict. Cost recovery harvests will commence at WNH as run entry and hatchery escapement warrants.

ESHAMY DISTRICT: The Eshamy District, excluding waters inside a line of buoys in front of the barrier seine, will open to commercial gillnet harvest for a 36-hour period starting at 8:00 am on Monday, June 8. The MBH AGZ will open to **SET GILLNET** permit holders only during the 36-hour fishing period starting at 8:00 am on Monday, June 8. Preliminary harvest estimates from the 36-hour period that started on Monday, June 1 were 4,167 sockeye and 684 chum salmon with 41 deliveries reported. Preliminary harvest estimates from the 36-hour period that started on Thursday, June 4 were 9,364 sockeye and 711 chum salmon with 78 deliveries reported.

Beginning on the Saturday, June 13 subsistence fishing period and continuing on all Saturdays until further notice, subsistence fishing is closed from the head of the bay to 200 feet outside of the MBH barrier seine unless the barrier seine is not in place. Currently, subsistence fishing on Saturdays is closed within 300 feet of the barrier seine and the closure area is being adjusted to align with the current sport fishery closure specified in 5 AAC 55.023.

PWSAC recommends a 36-hour fishing period in the Main Bay Subdistrict, excluding waters inside a line of buoys in front of the barrier seine.

SEINE FISHERIES: To reduce the harvest of salmon destined for other areas of PWS, area is being adjusted at Port Chalmers starting on Monday, June 8. Time and area at AFK, may be adjusted should sockeye harvest increase.

MONTAGUE DISTRICT: The Port Chalmers Subdistrict, **north of 60°12.56' N. lat. and east of a line from 60° 12.56'N., 147° 20.25'W. to 60° 20.00'N., 147° 14.30'W.,** will open to purse seine fishing for 48 hours starting at 8:00 am on Monday, June 8, for a 36-hour period starting at 8:00 am on Thursday, June 11, and a 36-hour period starting on 8:00 am on Saturday, June 13. **Regulatory closed waters and anadromous stream closures within the Port Chalmers Subdistrict will not be in effect until further notice.** A total of 840,000 chum salmon are forecast to return to Port Chalmers Subdistrict. The estimated harvest for the 48-hour period ending on June 3 was 28,800 chum salmon with 30 reported deliveries.

SOUTHWESTERN DISTRICT: The AFK Hatchery THA and SHA will open to purse seine fishing for 48 hours starting at 8:00 am on Monday, June 8, for a 36-hour period starting at 8:00 am on Thursday, June 11, and a 36-hour period starting on 8:00 am on Saturday, June 13. Anadromous stream closures within the AFK Hatchery THA and SHA will not be in effect until further notice. A total of 330,000 chum salmon are forecast to return to AFK Hatchery. Historical harvest timing for these chum salmon is from June 1 – July 27. The estimated harvest for the 48-hour period ending on June 3 is confidential.

Copies of the regulation booklet, *2025-2028 Commercial Salmon Fishing Regulations for Prince William Sound*, are available in the Cordova ADFG office.

ALL buyers purchasing fish in the PWS Management Area are required to complete a Processor Registration Form. Contact the Cordova office for any questions regarding registration.

The next scheduled gillnet fisheries announcement is anticipated to be at 2:00 pm Wednesday, June 10.
The next scheduled seine fisheries announcement is anticipated to be at 2:00 pm Saturday, June 13.

Announcement recordings are available for gillnet fisheries at 907-424-7535 and seine fisheries at 907-424-7345. In addition, announcement recordings are available in Anchorage at 907-267-2843.

Additionally, announcements, inseason harvest data, and escapement data are available at the following web address: <http://www.adfg.alaska.gov/index.cfm?adfg=commercialbyareapws.main> (Prince William Sound and Copper River homepage).

Unless otherwise specified, all openings are clock openings based on Alaska Daylight Time, which is based on Coordinated Universal Time and may be obtained by calling 303-499-7111.

The department encourages commercial permit holders to renew their licenses early and to check their CFEC vessel registration stickers to make sure they are current.

The department also encourages permit holders to report observed violations to Wildlife Safeguard at 800-478-3377. Reports are anonymous and cash rewards may be paid for successful prosecution of violations.
