2026 Yukon River Salmon Summer Fishery Announcement #13

Subdistrict 4-A Closure of all gillnets

Districts Affected: Upper Yukon Area

The 2026 Chinook salmon run size is forecasted to be well below average and is expected to be similar in size to last year. It is unlikely that any escapement goals will be met in Alaska or Canada. To protect the bulk of the Chinook salmon run as it migrates upriver, 4-inch or smaller mesh gillnets are being closed from the first quarter point to third quarter point of the run. Quarter point dates are based on historical run timing from recent years. Fishing for nonsalmon is still allowed during this 18-day closure, but is limited to non-lethal or selective gear types including hook and line, dip net, beach seine, hand line, longline, and fyke net. Pink and sockeye salmon may be retained. Chinook and summer chum salmon must be released alive.

Subsistence Management Actions

Fishing for nonsalmon is currently open with 4-inch or smaller mesh gillnets and other nonsalmon gear types including hook and line, dip net, beach seine, hand line, longline, and fyke net.

Subdistrict 4-A Lower (from $\frac{3}{4}$ of a mile downstream from Old Paradise Village upstream to Stink Creek, including Grayling and Anvik):

Effective 8 p.m. Tuesday, June 23 until 8 p.m. Friday, July 10, all gillnets must be removed from the water.

Subdistrict 4-A Upper (from Stink Creek to Cone Point, including Kaltag, Nulato, and Koyukuk):

Effective 8 p.m. Saturday, June 27 until 8 p.m. Tuesday, July 14, all gillnets must be removed from the water.
