Chinook salmon retention: the Situk River commercial set gillnet fishery is closed to the retention of Chinook salmon. Chinook salmon of any size may not be retained for sale or personal use. On the fish ticket, the number and weight of the fish must be recorded and the disposition code "70-Donated-nonretention-state fishery" must be used. Retained Chinook can either be delivered to a buyer at the time of sockeye salmon sale or to the Yakutat ADF&G office for distribution to those in need in the community.

Seal River: waters of the Seal River will be closed upstream of the confluence of the East Fork tributary of the Seal River (located downstream of Vitus Lake).

The Situk River Chinook salmon run would not be expected to meet the escapement threshold of 750 fish that would allow for the use of dual permits in the Situk-Ahrnklin Inlet and Yakutat Bay north of a line from Point Manby to Ocean Cape if additional harvest were to be allowed. Therefore, the use of dual permits will not be allowed until inseason projections of escapement are at or above the 750 fish escapement threshold. The subsistence, commercial, and sport fisheries remain closed to the retention of Chinook salmon in the Situk-Ahrnklin Inlet until further notice.

The Emergency Order corresponding to this announcement is EO 1Y0526.
