2026 HAWK INLET SALMON PURSE SEINE TEST FISHERY UPDATE # 2

The F/V *Osprey* conducted the second of the 2026 Hawk Inlet shoreline test fisheries on Friday, July 3. Comparing the daily harvests to the recent 10-year average harvests on or around this date, sockeye, coho, pink, and chum salmon harvests were well below average. Chum salmon harvest was 19% of average, sockeye salmon harvest was 56% of average, and pink salmon harvest was 1% of average. The pink salmon harvest numbers were not adequate for a pink salmon sex ratio.

The next test fishery is scheduled to take place on July 10.
