SOUTHEAST ALASKA COMMERCIAL SHRIMP BEAM TRAWL FISHERY

The guideline harvest level (GHL) for the fourth commercial beam trawl shrimp fishing period beginning November 1, 2026, is 250,000 lb in District 8, in accordance with the preseason advisory announcement that was released on April 28, 2026.

As described in the preseason announcement, this announcement is issued within the two weeks after the start of a fishing period to announce any GHL rollover from the previous period. This delay is due to the time it takes to accurately reflect harvest from the previous period.

Preliminary harvest for the third fishing period (September 1–October 31) in District 8 was confidential. Though not reportable due to fewer than three permits fished, this harvest was below the 250,000 lb GHL. The available rollover poundage will bring the fourth period GHL to the upper end of the GHR at 250,000 lb. For the full season in District 8 to date, coonstripe shrimp bycatch harvest is 560 lb and spot shrimp bycatch harvest is 2,198 lb.

Harvest to date for the third fishing period in District 6 is confidential.
