JUSTIFICATION:

The Alaska Board of Game established a registration permit moose hunt in Unit 22(D) Remainder during the 2020 Western and Arctic Board of Game meeting in Nome. The management objective for the area is to maintain the post hunt fall composition at or above 30 bulls:100 cows. Moose composition surveys completed in fall 2022 resulted in 23 bulls:100 cows. This survey result compared with previous results in the area suggest that the bull cow ratio has continued to persist below our management objective since 2013. With the adoption of a registration permit hunt in the area the department established a quota for the 22D Remainder hunt area of 17 bulls for the 2023-2024 regulatory year to prevent excessive bull harvest and allow for the bull:cow ratio to increase.

The fall harvest quota of 17 bull moose is expected to be reached by the season closing date announced in this emergency order and no further harvest is warranted.
