Douglas Assistant Area Biologist

JUSTIFICATION:

Biologists conducted aerial surveys between 2016-2021 and documented the following goat counts: 48 goats (2016), 29 goats (2019), 34 goats (2020), and 41 goats (2021). There were 40% fewer goats observed in 2019 versus 2016. Population estimates indicate that numbers remain low. Due to the vulnerability of goats in this area, an emergency order is being issued.
