JUSTIFICATION:

Hunt managers set a harvest quota of three males or one female for the Bear Mountain hunt zone of mountain goat hunt RG150 on Baranof Island. Quotas are based on the most recent aerial surveys. The strategy of closing hunt zones when one female has been harvested has been very effective in reducing female harvest and has helped maintain high harvest opportunities for male goats. Keeping hunters focused on avoiding female harvest maintains opportunities for more hunters to participate, especially in hunt zones that have good access.

To date, two males and one female goat from Bear Mountain have been harvested. Therefore, this zone is being closed by emergency order.

Managers will reassess and make in-season adjustments to hunt zone quotas and/or open and close zones when updated surveys are conducted this fall.
