Annahootz Mt. Goat Hunt Zone Closed

(Sitka) – Hunt managers set a harvest quota of five males or one female for the Annahootz hunt zone of mountain goat hunt RG150 on Baranof Island. Quotas are based on the most recent aerial surveys. The strategy of closing hunt zones when one female has been harvested has been very effective in reducing female harvest and has helped maintain high harvest opportunities for male goats. Keeping hunters focused on avoiding female harvest maintains opportunities for more hunters to participate, especially in hunt zones that have good access.

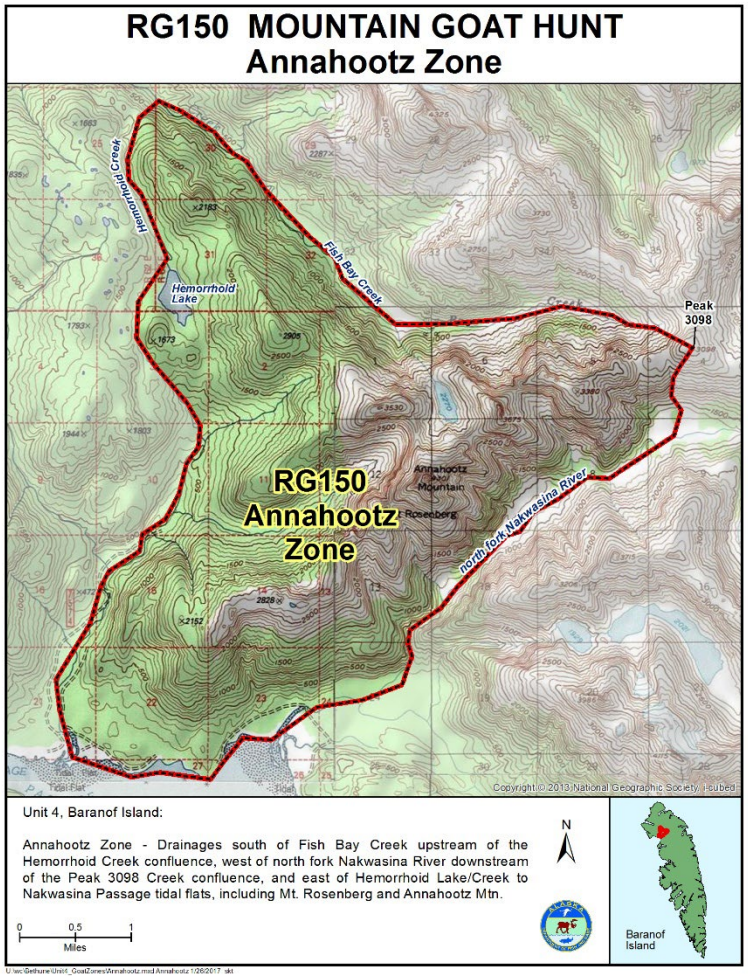

To date, three males and one female goat from the Annahootz hunt zone have been harvested. Therefore, this zone is being closed by emergency order (EO) at 11:59 PM, Tuesday, November 24, 2026.

Emergency Order (EO) R1-19-26 was issued to close the mt. goat season in the Annahootz zone on Tuesday, Nov. 24, 2026 @11:59 pm.

The Annahootz zone could be over-utilized if additional harvest occurs. Managers will reassess and make in-season adjustments to quotas and zone closures when updated surveys are conducted.

Those portions of Unit 4 not affected by this emergency order will remain open until harvest quotas are reached or the season concludes.

For maps, zone quotas, FAQ's and other information, contact the Sitka area office at (907) 747-5449.
