

Advisory Announcement

For Immediate Release: October 9, 2026

Ship Creek Moose Permit (RM435) to be Issued Online Only in 2026

(Anchorage) – The website experienced technical difficulties during the original issuance date of the registration moose permits for the Ship Creek drainage in Unit 14C (RM435). As a result, the RM435 will now be available ONLINE ONLY **starting at 8:00 AM on Tuesday, October 13, 2026**. Permits will be available at www.hunt.alaska.gov and 100 permits will be issued.

This hunt is open to any resident or non-resident and the permit is non-transferable. Hunters must have a valid hunting license and may not have harvested a moose anywhere else in the state this regulatory year. Hunters on the failure to report list are not eligible for this permit. Season dates are October 25 – November 30, 2026; however, the hunt will be closed by emergency order when the harvest quota is reached. The quota will be announced on or before Oct. 15. Access to the hunt area is limited and the terrain is extremely demanding.

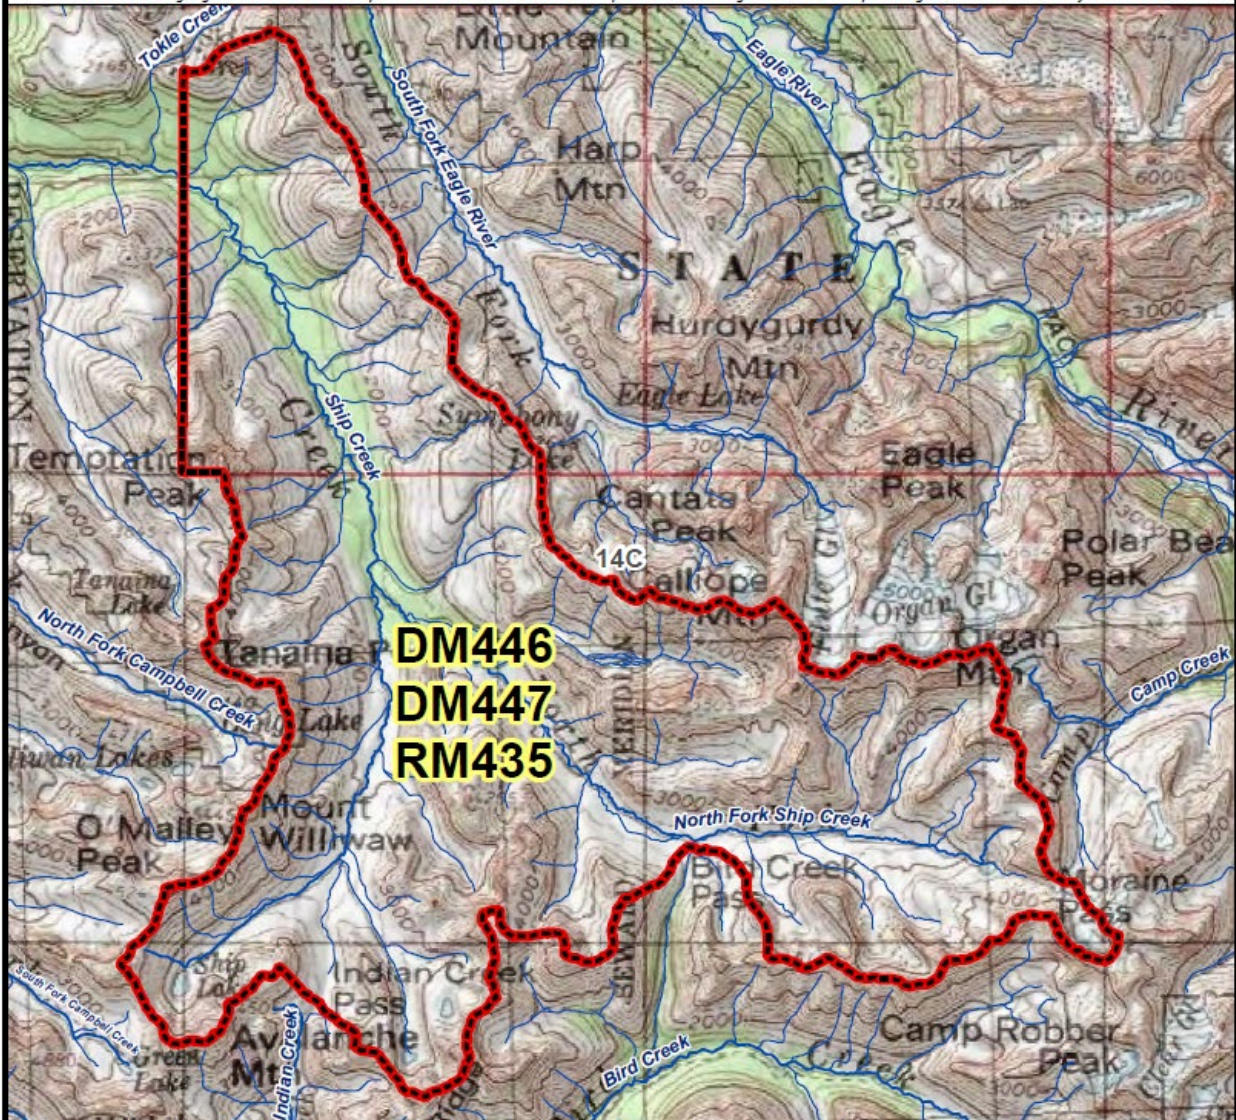

Successful hunters must report in-person to the Anchorage or Palmer ADF&G office within 3 days of harvest. When reporting, successful hunters must also turn in the required 5-inch section of the lower jaw. For specific details of the RM435 registration permit, please visit the following link:

DM446 DM447 RM435 Moose Drawing and Registration Permit Hunt

This map is intended for hunt planning use, not for determining legal property or regulatory boundaries. Content is compiled from various sources and is subject to change without notice. See current hunting regulations for written descriptions of boundaries. Hunters are responsible for knowing the land ownership and regulations of the areas they intend to hunt.

AREA DESCRIPTION: Unit 14C, that portion of Unit 14C within the drainage of Ship Creek above the JBER boundary, excluding the Tolke Creek drainage.

Please refer to the Alaska Hunting Regulations booklet for bag type, seasons, and additional regulations concerning this hunt.
