Emergency Order 01-02-22

All other mountain goat hunting regulations in Unit 4 remain unchanged and are not affected by this emergency order.

Doug Vincent-Lang
Commissioner

By delegation to:
Stephen Bethune
Sitka Area Wildlife Management Biologist

JUSTIFICATION:

Based on aerial surveys, the South Baranof hunt zone has historically had population levels too low to conduct a sustainable hunt. Mortality data from collared goats during the past three winters indicate that the goat population on Baranof Island has likely declined since the most recent surveys. Harvest in the South Baranof zone could result in over-utilization due to low population levels and accessibility.

Managers will re-assess and make in-season adjustments to hunt zone quotas and/or open and close zones when updated surveys are conducted in September.
