### **Extension of Winter Moose Hunts in Game Management Unit 17A**

(DILLINGHAM) – The Alaska Department of Fish and Game and the U.S. Fish and Wildlife Service, Togiak National Wildlife Refuge, are announcing a two-week extension to the winter moose hunting season in Game Management Unit 17A. The hunt will be extended and continue through February 3, 2022. The bag limit is two (2) moose. Hunters who have already harvested a moose during the current regulatory year are eligible to participate in this hunt but can only take one additional moose.

The most recent aerial survey conducted in Unit 17A under good snow conditions was in March 2017, and resulted in an estimate of 2,370 moose, well above the population objective of 800–1,200. October 2017 composition surveys estimated 77 bulls and 24.5 calves per 100 cows. Additional survey information from 2019 indicates the population remains above objective.

To participate, hunters must possess a valid Alaska state hunting license and at least one state registration permit (RM575 and/or RM576). Hunters will be allowed to shoot one antlered bull if they have registration permit RM575 in their possession and/or one antlerless moose if they have permit RM576. Hunters are required to have both permits to shoot two moose (one antlered bull and one antlerless moose). Hunters who have already taken a moose in fall 2021 can only harvest one additional moose.

Registration permits are available at the department's Dillingham office and Togiak Traditional Council office. Successful hunters are required to report to the department's Dillingham office (907-842-2334) or the Togiak Traditional Council (907-493-5003) within 3 days of killing a moose. All permit reports must be returned to the department within 15 days of the close of season regardless of if you hunted.

For additional hunt or permit information contact the Alaska Department of Fish and Game in Dillingham at 907-842-2334, or U.S. Fish and Wildlife Service, Togiak National Wildlife Refuge, at 907-842-8406.
