

Kodiak Road Zone Sport Fishing Enhancement Projects

The Department of Fish and Game annually funds numerous fisheries enhancement projects throughout Alaska in order to increase the abundance and diversity of fish species available to anglers. On Kodiak Island several enhanced sport fisheries are maintained in Road Zone waters and include populations of anadromous king salmon, plus both anadromous and landlocked coho salmon and resident rainbow trout. Hatchery raised king salmon can be caught from mid-June through early August at the American and Olds river drainages, Salonie Creek and also at Monashka Creek near Termination Point. Anadromous coho salmon releases from a local hatchery have been recently discontinued but will commence in 2017 with returns to Mill Bay, Monashka Creek, and Pillar Creek waters from early August through September. Rainbow trout annually stocked in 17 Road Zone lakes are available to anglers year-round and are also fished through the ice when safe conditions exist.

- Stocked location maps are available from the Kodiak ADF&G office and also online: (<http://www.adfg.alaska.gov/index.cfm?adfg=fishingSport.region&StockingAreaID=8>).
- Additional information on Kodiak and other sport fisheries enhancement activities can be found at the Division of Sport Fish website: <http://www.adfg.alaska.gov/index.cfm?adfg=fishingSport.main>
