

# TROUT AND OTHER SPECIES FOUND IN SOUTHEAST ALASKA

## RAINBOW TROUT

Green to bluish back with silvery to yellowish-green sides. Broad pinkish band along side and black spots on back, sides, and tail. Upper jaw usually does not extend past eye on adult.

## ARCTIC GRAYLING

Light copper brown to dark purple back, fading to bluish-gray with black spots on sides. Very large dorsal fin with red and violet spots.

## DOLLY VARDEN

The body has a background coloration that can range from emerald green to bluish-gray or silver and is covered with lots of small light red spots (usually smaller than its pupil). The tail is slightly forked and there are no distinct spots on head or tail. Lower fins are red or orange with a white anterior border. Easily confused with Eastern Brook Trout, but Dolly Varden do not have wormlike markings on their back or dorsal fin. Found both in fresh and salt waters.

## STEELHEAD TROUT

White mouth with white gums at base of teeth on lower jaw.  
California Department of Fish and Game

Sea-run rainbow trout with bluish-gray back and bright silvery sides. Slender body profile; 8-10 anal fin rays. Small black spots on back, sides, and tail. Pink/red coloration develops after returning to fresh water to spawn.

## CUTTHROAT TROUT

Yellowish-green body with no pinkish band along sides. Many black spots on back, sides, and tail. Upper jaw extends well past eye on adults. Red to orange slash on underside of lower jaw.

## EASTERN BROOK TROUT

Dark green or blue background with white belly; its upper body and dorsal fin have wavy, pale yellow wormlike markings or vermiculations. Its sides have small red or pink spots surrounded by light blue halo rings scattered among larger light yellow spots. The lower fins are white tipped and the tail is square. Not found in marine waters.
