---

Hi Glenn, hoping you can forward this to Sue, Orville, Fritz and John, thanks. Richard Person

South k beaches petition could be very helpful in the management of uci during next years fishery. It is becoming more and more apparent that the department needs to be able to manage the fishery in season as accurately (surgically) as possible. It is unquestionable that the Kasilof and Kenai sections impact the runs in different ways at different times. Giving the department the authority to manage the fishery in at least two sections is reasonable. If the department had the resolve to manage by Statistical area, an even better red to king ratio could be achieved. Please consider both these ideas as you meet tomorrow. Thank you for your time and effort. Hopefully at some point we can all kill some fish this summer! Richard Person
