Page 6 Page 8 CHAIRMAN MORRIS: I don't know. It seems like offer specifics. We're seeking incorporating many many we're just voting on unanimous consent or not without elements, elements of previous management plans discussing the proposal. Mr. Nelson. It specifically says and states the Post Heiden MR. NELSON: Mr. Chairman. I mean substitute section and that's what the substitute language will be referring to, is opening a part of Port Heiden section. language basically is the same as an amendment. The process that we're talking about is whether the Board Again, I don't see a problem with this proposal. is going to adopt the amendment or the substitute CHAIRMAN MORRIS: Mr. Nelson. language by unanimous consent. I think there was an MR. NELSON: Thank you, Mr. Chair. 1 know we 15 16 17 18 19 objection to that, so I think that puts it back to the got kind of wrapped up in the padiamentary discussion same thing, to the amendment or an offer for substitute of the substitute language or amendment or whatever. I language, but we're going to have to debate the guess I haven't really heard anybody speak to the amendment and vote on it and then depending on how that Department's reaction to the substitute language and what it does goes, then we'll have a debate and action back on the 255 275 286 296 313 323 343 355 367 373 444 443 444 445 CHAIRMAN MORRIS: Can we hear Statf comments on CHAIRMAN MORRIS: Please, Ms. Williams. 29 it, on the substitute language or amendment. 30 31 32 33 34 35 36 37 withdraw your substitute language and withdraw the STAFF: Mr. Chairman. The substitute language second request and offer it as an amendment. that is submitted under Proposal 210 would open a MR. NELSON: 1 think her offer is still an portion of the Outer Port Heiden Section southwest of offer for amendment or for substitute language. Mr. 158 36 west longitude from June 20th through July Heyand's objection just objected to a document by 31st. Fishing period will be the same as in other unarimous consent so I think that just means we're areas from 6:00 a.m. Monday to 6:00 p.m. Wednesday. still on a motion to amend. We're just going to have The area will be managed on the basis of Meshik River to debate it and vote. sockeye salmon with provisions for the conservation of CHAIRMAN MORRIS: Okay. Ms. Williams, the Ugashik River sockeye salmon. MR. NELSON: Mr. Chairman. I see this as kind Page 7 Page 9 MS. WILLIAMS: I would agree with Mr. Nelson on of a conflict with the Board's standing rules not to -that. We're going to have to vote. So if we vote, it I mean this, to me, looks like a bit of a - kind of a is not adopted by unanimous consent on the substitute liberalization of fishery regulations and our standing itself. Pve got to point out some discussion that rules for the Board, which you'll find under the findings tab. It specifically says do not change or took place in the meeting in the community. The author 10 11 12 13 14 15 of the proposal, Roland Briggs, said Ugashik had some reverse the intent of the proposal at issue. For discussion with the Department. The Department example, if the proposal's intent is to restrict a initially thought that this was a one mile off the particular fishery and the Board wishes to close or coast May 1st - June 30th North and South Peninsula. expand the fishery, the Board will not amend the He said, no. no. just North Peninsula. And then it was original proposal. 19 20 21 22 23 24 25 narrowed down from North Peninsula to the Northeastern, So I think you've taken a proposal that, from my read, you want to further restrict the North if I've got the right description. Peninsula fisheries and you've broadened it if we turn Consequently, the remainder of the discussion 26 27 29 30 31 32 33 34 35 37 39 40 it around. So I don't think it's consistent with the dealt with the merits if this were to apply - if this proposal were to apply to that much smaller area. I Board's standing rules and I don't support it in nature think that is where the focus of the substitute anyway. For both of those reasons I'll be opposing it. 32 33 34 CHAIRMAN MORRIS: Mr. Nelson from law, can you language lies, in the area where we wound up give your comments on that. 35 36 37 38 39 40 MR. L. NELSON: I'm not sure what question Mr. Campbell sure can use my glasses. CHAIRMAN MORRIS: Mr. Campbell. you're..... MR. CAMPBELL: Thank you, Mr. Chairman. 1 CHAIRMAN MORRIS: Well, the question would be by taking this proposal, which would essentially be would agree with Ms. Wilson -- or Ms. Williams, excuse me. I think Proposal 210 is an excellent vehicle to restrictive, and using it as a vehicle to provide an discuss this, but many of the proposals at this meeting. opening in an area and make it less restrictive. I - a lot of these proposals were very general, did not know we've done this before and (indiscernible). I've

Phone: 907-243-0668

Fax: 907-243-1473

Page 10

seen the Board do exactly the opposite of what was requested in the proposal on amendment probably 50 times in my career.

MR. L. NELSON: Right. That's probably up to you on how you interpret that. There may be other characterizations about — in response to Mr. Nelson's views on it that it doesn't have that impact. That should all be discussed and debated and be part of the record.

CHAIRMAN MORRIS: Mr. Campbell.

MR. CAMPBELL: Thank you. Mr. Chairman. You know, I would agree with — you know, a fair assessment of that. I agree, in the spirit of the findings or not you would do a complete reversal of the proposal. This proposal was very vague, very generalized and it seeks to open a section of the Port Heiden district. That Port Heiden district has been closed for a long time.

So I don't understand the problem here with this. I think it's — granted, we're argaing about the one to three miles and that's going to be open for debate, but that's the section that I'm looking at that I think is appropriate as a vehicle.

The alternative would be to offer this as a legitimate proposal. So I mean that's — we've got a few options before us here. Mr. Chairman.

Page 12

CHAIRMAN MORRIS: I have a question, Mr. Murphy. In the absence of this proposal or this action, how would you be able to manage for the previous actions that we took?

MR. MURPHY Mr. Chairman. A point of clarification. Are you referring to. . .

CHAIRMAN MORRIS: Referring to an opening providing that prior opening for those areas.

MR. MURPHY: Mr. Chairman. The language — the additional language is providing harvest opportunity to the Mestrik River. As far as I don't see any complications with Proposal 207 with the language that's before you.

CHAIRMAN MORRIS: Thank you, Mr. Heyano. MR. HEYANO: The Board has left me behind, Mr.

Chairman.

CHAIRMAN MORRIS: I'm sorry.

MR. HEYANO: We're discussing the substitute language, is that what we're doing here?

CHAIRMAN MORRIS: Yes.

MR. HEYANO: That's what's before us?

CHAIRMAN MORRIS: Yes. It's an amendment

We're discussing the amendment.

MR. HEYANO: Okay

CHAIRMAN MORRIS: I was just trying to get a

Page 11

CHAIRMAN MORRIS: Mr. Jensert.

MR. JENSEN: Did you call me?

CHAIRMAN MORRIS: Yeah. Did you raise your
?

MR. JENSEN: I guess I will. I sort of agree with Mr. Campbell. I believe this is an adequate vehicle to take this one up on. It's talking about the area and I think we should go with it. Mr. Chair.

CHAIRMAN MORRIS: Other Board members. Me. Williams.

MS. WILLIAMS: During the committee part of the rationale offered by the author for his proposal is to compress the fishery around Port Heiden in order to address the escapement problems. This substitute language also addresses the escapement problem. although it does so I think in a more reasonable and logical manner. The fish are coming from the north. If you open up this previously closed area a small distance from the middle of the port to the longitude would be 13 miles, a little over 13 miles. From the point of land, a little over six miles. If we could open that up and make it available for fishing, we address the problem of overescapement in Port Heiden.

Proposals are offered to address problems and produce a better solution. better understanding how that amendment would impact the ability to manage the fishery or the lack of the amendment. Mr. Heyano.

MR. HEYANO: Okay. Now Im halfway up to speed bare. In regards to Mr. Nelson's comments about the Board's finding and what the intent of this proposal was in comparison to substitute language before us

Am I correct in understanding at least the components of the substitute language are maintaining that the intent of Proposal 210 is actually to have a Port Heiden fishery on the outside?

CHAIRMAN MORRIS: Well, I think that was their belief. I think we also understand if it isn't, we still have that option available to us, but I believe that's correct. I'll let them speak for themselves.

Mr. Campbell

MR. CAMPBELL: Well. Mr. Chairman, I'll take a stab at that. I mean it's — let me find it here in the blue book. I might have to go into filibuster mode here, but I'll start reading Proposal 210 out of the blue book.

Proposal 210, 5 AAC 09.200 description of districts and sections. Administrative language as follows: Bring boundary to one raile from mainland June 30th for sockeye season. Issue: Ability to go out

4 (Pages 10 to 13)

Email: sahile@gci.net

Page 13

Page 14 Page 16 three miles in Port Heiden. Three Hills and Ilrik if we actually generate proposals such as this that fishing sections for sockeye season. What will happen further provides contentions in the fishery You know, if that is done: Continue interception of fish, we should be looking to resolve some of those issues intrrove the quality of the resource harvest and react and respond to concerns from the Previously approved: Not applicable. Who is likely to participants, not to go forward and actually generate benefit: Terminal fisheries. Who is likely to suffer: (huliscernible) harvest terminal fisheries. Other That's my comments on the process. Mr. 13 14 15 16 17 solutions to consider. Past solutions in the current Chairman. Speaking to the substitute language, we Board have reverted for years. Proposed by Roland don't know what the stock composition is of this 19 20 21 22 23 fishery. It's been closed since 1990. I would have It's pretty generalized in it's nature. I assumed that if the Department had concerns for can't interpret the reading of this fully by the extent 23 24 25 26 27 28 escapement, they would have seen the proposal similar 24 25 26 27 of what's written in this proposal. Fin ready to to the previous one opening up - further opening up listen Mr. Chairman. CHAIRMAN MORRIS: Do other Board members have 29 30 31 32 33 34 35 36 37 38 39 40 41 42 43 I think, Mr. Chairman, and for the Board questions or comments. members, if you recall in December there was at least 32 33 (No comments) three proposals asking for similar consideration in the 34 35 36 37 38 CHAIRMAN MORRIS: Well. I agree with this. I Bristol Bay fishery. Although I wasn't able to think it's completely consistent with the action we participate in that discussion, the Board refused those took in 207. It provides us with the opportunity to proposals, concerns of stock composition and the accomplish those goals of avoiding overtarvest in those harvest, the ability for the Department to be able to systems apportion those costs back to the river of origin. Any additional comments or question. Mr. They're all concerns I heard. I think at the end of the meeting the Board did Hevano. MR. HEYANO: Thank you. Yes, Mr. Chairman. I the correct thing and supported a commissioner's permit Page 15 Page 17 think that the substitute language before us in my to do a test fishery to see what the composition of opinion doesn't reflect the intent of 210. I think those stocks were through genetics work before prosecuting the fishery. That seems to be the correct some of the Department's comments is there would likely be no effect on the Outer Port Heiden or Caribon Flats approach, Mr. Chairman, rather than opening the fishery section, which is already closed by regulation, unless and getting the information later. 10112314567199012234566739901233456739901223445674990 11 12 13 the proposal is requesting a May 1 opening date within I guess we know that this is an issue of one mile of shore overescapement. I don't think it's raised to the level I go through the panel comments and I don't see of the Department's concern or else I would assume that there would have been a proposal in. Having said that. where there's any discussion and I'm assuming that if the intent of 210 was in the substitute language, there Mr. Chairman, I won't be supporting the proposal. CHAIRMAN MORRIS: Thank you. Other Board would have been a lot of pro and con discussions about opening an area that has been closed since 1990. I members. Mr. Jensen. MR. JENSEN: Thank you, Mr. Chair. I just have believe, by regulation. I went through last night and reviewed the RCs. one question for law. My understanding was that once a 29 I didn't see any request for opening a Post Heiden proposal is submitted to the Board it becomes the section. Obviously there isn't a proposal directly Board's property and we can do anything we want with requesting the opening of the Post Heiden section. it. Am I right in assuming that? Is that a correct 34 35 I realize it's probably within the purview of the Board to amend and provide substitute language. I CHAIRMAN MORRIS: Mr. Nelson don't think it's in the best interest of the Board or MR. L. NELSON: Mr. Chairman. I don't know if that's quite the way I'd frame it. What you've done is the public process to have Board-generated, in this case, substitute language for an issue as contentious you issue a call for proposals on and we've received as this is. It seems like in the past (indiscernible) those, but beyond that we've also decided to put the and Mr. Nelson's comments is that we react to a request public on notice that you're going to address the complete scope of the issues for different areas of the from the public. I don't think it serves this process

Phone: 907-243-0668

Fax: 907-243-1473

Page 20

Page 18

state and different stocks and stuff

So what you're really bound by under the APA is your legal notice, not the proposals that are before you. The legal notice will specifically say the Board will not be limited to the actual language of the proposal before them for the action you will take. That's the way the APA is designed to work.

You put out the natice of what you're going to accomplish and give yourself leeway to address the information that comes before you at the meeting and during the public process to make changes and generate your own proposals if you want to.

I don't know that it's - I don't know that I think the proposal becomes the property of the Board. but it's certainly within the power of the Board to adopt changes to proposals to generate its own proposals like you've done on a regular basis.

17

From the language read from the finding in 1991 that Mr. Nelson read from that's the framework that you set up for yourself. Pd point out probably unfortunately it's been largely ignored by Boards many times in the past as an exact method to be used to get to the formal language that you want, but it is a policy that you've adopted that I think out of sensitivity to the proposers and complaints of their

Mr Nelson

MR. NELSON: Thank you, Mr. Chair. I mean obviously. I mean as was pointed out earlier, the Board could -- you know, it could do a subsequent Boardgenerated proposal or whetever to include this, but getting towards what came at us for North Peninsula. the proposal never spoke with expanding the area of the fishery. I mean there was a little bit dealing with dates, but nothing spoke to addressing the (indiscernible). I still see this as a departure from the proposals that the Board received whether it's done as substitute language or as a subsequent Boardgenerated proposal.

CHAIRMAN MORRIS: So noted. Thank you. Ms

MS. WILLIAMS: When we put out a public notice of the meetings, people begin to prepare proposals They see problems in a given fishing district and they write proposals that attempt to address those problems Here comes a proposal. It is supported in the committee hearing by the author who says here is the problem. Underescapement in Port Heiden. Here is his solution. We could vote down his solution and ignore the problem or we could seek to address the problem. The substitute language seeks to address the problem.

Page 19

proposale getting turned around, but it is something. the Board does on a regular basis. I don't think it affects the legality of the proposal. I think it's a policy decision that you made to - on a public relation basis with the public

If you vote it down, the substitute language. it would be - because of the sensitivity about the policy, it would be possible for another Board to make a motion for a Board to a proposal and go through it independent of any reference to a proposal before you. I would take a little more time, but the same thing could be accomplished.

CHAIRMAN MORRIS: Thank you. MR. JENSEN: Yeah, I just - you know, my assumption was that this meeting was noticed and I knew we were going to take up issues that would pertain to this type of stuff. Maybe I'm insensitive, but if we do this consistently and don't adhere to the colleguy of the findings in 1991. I don't see why we'd be getting too far away from what we normally do. Mr.

CHAIRMAN MORRIS: All right. I think we've beat this to death. We clearly can do it. Let's have some more comments on the amendment. I think we're still discussing the amendment at this point

If we believe there is a problem, we should be addressing it. That is what the Board has the authority to do. They eather proposals and problems are handed out to them. In some instances, those solutions to the problems are accepted and other instances we amend them, change them to what we think is a better one or we night reject them because we think there isn't a problem or because we don't have a solution at the moment that we think will work well.

I think we are well within our legal bounds. It would be a dereliction of duty, in fact, if we failed to take action on what we see is a good problem - is a real problem and a possible real solution. CHAIRMAN MORRIS: Thank you. MR. MARCOTTE: Question. CHAIRMAN MORRIS: Mr. Marcotte MR. MARCOTTE: Okay. This is about the

MR. JENSEN: I'm sorry to interject here. Can we just set clarification of what a ves vote does and what a no vote is doing here.

CHAIRMAN MORRIS: Mr. Marcotte MR. MARCOTTE: A ves vote would put the amendment as found in RC 23, page 8, in front as.... MR. JENSEN: In front of us

6 (Pages 18 to 21)

MR. MARCOTTE: Campbell.		22	mairtain escapement goals. So I think this proposal	
MR. CAMPBELL: Yes.		24 25	does a good job to address that and I'll be voting in	
MR. MARCOTTE: Jensen.		26 27		
		28 29	SUPPORT.	
MR JENSEN: Yes.		30 31	CHAIRMAN MORRIS: Do you want semeone to deal	
MR. MARCOTTE: Okay. The motion carries 4 in		32	with the allocation, somebody. Mr. Jersen.	
favor, 2 opposed, Mr. Chairman.		33 34	MR. JENSEN: No. Yes. Mr. Chair. I would like	
CHAIRMAN MORRIS: We're back to the proposal.		35 36	to comment first in favor of this proposal, Mr. Chair.	
Ms. Williams.		37 38	I do believe it's consistent with management the same	
MS. WILLIAMS: Well, as with the Board, there		39 40	fishery policy. I'd like to reference comments from RC	
is exciting Committee action on this and I'm not sure		41 42	53 that pretty much mirror what I would say about this.	
that the well, I'm going to read the pros and the		43	It could change the number of participants in	
cons. The intent of this proposal was for a change in		45 46	the fisheries. It could bring more folks up on the	
Ilmik and Pert Heiden sections only. This would		47 48	south side and they may catch a few more fish, but the	
concentrate the fleet closer to finik to better control		49	whole intention of this proposal is to catch the fish	
	Page 23			Page 2
escapement. There would be a small harvest of fish	Page 23	1	that are running in the Meskik. That's my impression	Page 2
escapement. There would be a small harvest of fish bound for other areas. Setness are overfished within a	Page 23	2	that are running in the Meshik. That's my impression of the proposal anyway, Mr. Chair.	Page 2
bound for other areas. Setnets are overfished within a	Page 23	2		Page 2
bound for other areas. Setnets are overfished within a	Page 23	2 3 4 5 5 7	of the proposal anyway, Mr. Chair.	Page 2
bound for other areas. Setness are overfished within a half mile of shore. There is a surplus of fish and liberalization of regulations basuft helped.	Page 23	23455739	of the proposal anyway, Mr. Chair. I don't think there's very much ability for alternate fisheries resources that time of year. This	Page 2
bound for other areas. Setness are overfished within a half mile of shore. There is a surplus of fish and liberalization of regulations hasn't helped. The core. The area is exposed to the Bering.	Page 23	2 3 4 5 5 7 3	of the proposal anyway, Mr. Chair. I don't think there's very much ability for alternate fisheries resources that time of year. This should provide more opportunity for this stock of fish.	Page 2
bound for other areas. Setness are overfished within a half mile of shore. There is a surplus of fish and liberalization of regulations hasn't helped. The cons. The area is exposed to the Bering Sea and is often unfishable during orshore winds.	Page 23	2 3 4 5 5 5 7 9	of the proposal anyway, Mr. Chair. I don't think there's very much ability for alternate fisheries resources that time of year. This	Page 2
bound for other areas. Setness are overfished within a half mile of shore. There is a surplus of fish and liberalization of regulations hasn't helped. The cores. The area is exposed to the Bering. Sea and is often unfishable during orshore winds. There are sandbars and large seas inside of one mile.	Page 23	2 3 4 5 5 7 8 9 10 11 12	of the proposal anyway, Mr. Chair. I don't think there's very much ability for alternate fisheries resources that time of year. This should provide more opportunity for this stock of fish. The importance of this fishery, to commonly state, it's	Page 2
bound for other areas. Setness are overfished within a half mile of shore. There is a surplus of fish and tiberalization of regulations hasn't helped. The core. The area is exposed to the Bering Sea and is often unfishable during orshore winds. There are sandbars and large seas inside of one mile. There are many safety concerns. You can see an	Page 23	2 3 4 5 5 7 8 9 10 11 12 13	of the proposal anyway, Mr. Chair. I don't think there's very much ability for alternate fisheries resources that time of year. This should provide more opportunity for this stock of fish. The importance of this fishery, to commenty state, it's important. It does provide money to the state and also it's important to the region in which the fishery is	Page 2
bound for other areas. Setness are overfished within a half mile of shore. There is a surplus of fish and liberalization of regulations hasn't helped. The core. The area is exposed to the Bering Sea and is often unfishable during orshore winds. There are sandbars and large seas inside of one mile. There are many safety concars. You can see an increase in escapement. This will compress the fleet	Page 23	2 3 4 5 5 7 7 8 9 10 11 12 13 14 15 16	of the proposal anyway, Mr. Chair. I don't think there's very much ability for alternate fisheries resources that time of year. This should provide more opportunity for this stock of fish.
