

PROPOSAL 137

5 AAC 47.055. Southeast Alaska King Salmon Management Plan.

Increase the regional resident king salmon possession limit when the Southeast Alaska Area preseason king salmon abundance index is greater than 2.0, as follows:

(c)(2) a resident bag limit of 3 kings salmon and possession limit of 6 [3] king salmon 28 inches or greater in length.

What is the issue you would like the board to address and why? Provide Alaska residents additional opportunity to harvest king salmon during periods of high levels of abundance; when the Southeast abundance index is greater than 2.0.
