Proposal 147: replacement for Table 147-4 (page 74 of RC 2 Staff Comments)

Table 147-4. Subsistence sockeye salmon harvests for the Chignik Lake subarea, by date and year.

Year	Harvest before July 5	Harvest from July 5 to September 15	Harvest after September 15	Subtotal, all harvest on or after July 5	Totals
1993	223	241	3,201	3,442	3,665
1994	654	1,037	2,213	3,250	3,904
1995	39	129	2,224	2,352	2,391
1996	11	319	1,923	2,243	2,254
1997	533	791	3,545	4,336	4,869
1998	0	424	1,734	2,158	2,158
1999	260	461	1,173	1,634	1,894
2000	457	223	1,856	2,079	2,536
2001	271	297	2,437	2,734	3,004
2002	570	924	1,908	2,832	3,401
2003	978	493	1,644	2,137	3,115
2004	400	160	1,233	1,393	1,793
2005	382	851	702	1,553	1,935
2006	660	870	742	1,612	2,273
2007	1,580	230	1,224	1,454	3,034
2008	542	1,198	578	1,775	2,317
2009	256	966	855	1,820	2,076
2010	975	876	586	1,462	2,438
2011	939	1,179	1,390	2,569	3,508
2012	757	324	669	994	1,751
2013	1,397	837	308	1,145	2,543
2014	1,213	919	1,614	2,532	3,746
2015	551	1,546	901	2,446	2,997
2016	889	1,664	918	2,582	3,471
2017	756	883	227	1,110	1,865
2018	225	351	343	694	920
5-year avg (2013-2017)	961	1,170	794	1,963	2,924
10-year avg (2008-2017)	827	1,039	805	1,844	2,671
25 year avg (1993-2017)	612	714	1,432	2,146	2,757

Source ADF&G Division of Subsistence.

Notes: 1. The Chignik Lake Subarea includes subsistence harvests from Mensis Point in Chignik Lagoon, Chignik Lake, tributaries to Chignik Lake, upper Chignik River, Black Lake and tributaries.

2. Data for 2018 are preliminary, as of 2/19/2019

3. From 1993 to 2008, as well as in 2011 and 2014-2016, postseason household surveys were conducted to supplement harvest data collected through returned permits.
