

RC# _____

Combine Management of the SEDM and Dolgoi Island Area
Fisheries June 1- July 25

1. Repeal the Dolgoi Management Plan June thru July 25(5AAC 09.365 (f) and 5AAC 09.366(j)
2. The SEDM and Dolgoi Island (South Central District and Volcano Bay Section of the Southwestern District) area will be managed concurrently (same fishing periods and closures) from June 1- July 25. Excluded is the NWSS of the SEDM from July 1-25 to be managed as a terminal stock harvest area on the Orzinski sockeye run.
3. A 12% Chignik allocation is assigned to the combined SEDM & Dolgoi (South Central District and Volcano Bay Section of the Southwestern District) harvest areas. The 12.0% allocation will be computed from the Chignik Management Area (CMA) (terminal) sockeye catch. The sockeye harvest in the Northwest Stepovak Section of the SEDM from July 1-July 25 is excluded from the 12% assigned allocation.
4. The Chignik stock assignment will remain at 80% and applied through the combined SEDM and Dolgoi Island harvest areas.
5. The above, 1-4, address the proposed changes from the current regulations. As an example of what will remain unchanged: salmon may be taken only by setnet gear from 1 June through July 10, with the exception that salmon may be taken by drift gillnets as detailed under 5AAC 09.330 (d)(1)(B)(ii).
