

Submitted by: Area M Working Group

Impact of RC 81

- This proposal would reduce time for Area M seiners in June by 40%
- The way the proposed Shumagin Island and South Unimak schedule is set under this RC potentially would allow seine boats to fish everyday between June 8 and June 29. Currently they fish less than half of the month in June.
- The fishing schedule is different from South Unimak, defeating the idea of aligning windows throughout the South Peninsula as proposed in RC 78.
