Dear Members:

I am writing in support of the language in Bart Meyer's RC 25 that provides draft compromise language for Proposal 27 on setnet stacking. However, I suggest that the term "spouse" be added to (D)(c) as follows: (c) a family for the purposes of this section is defined as a grandfather, grandmother, father, mother, brother, son, daughter, or spouse."

Thanks for your time and consideration.

Sincerely,

Lindsey Aspelund
