

Statement of Position

RC 110

Proposal 104. 5 AAC 21.359. Kenai River Late Run King Salmon Management Plan

The undersigned members of the Matanuska Susitna Borough Fish and Wildlife Commission have changed their individual and initial position from OPPOSITION to SUPPORT IN CONCEPT for proposal 104.

This position change is based upon information gained during the BOF meetings about the details of Proposal 104 and actions already taken on Proposal 133.

In the original position statement, concern over Proposal 104 was largely centered on its possible impact on drift fishing time in the Conservation Corridor. With the passage of Mat SU proposal 133, those concerns are significantly ameliorated and allows the undersigned members of the Mat - Su Fish and Wildlife Commission to revise their positions.
