RC148

To: Alaska Board of Fish

From: South K-Bch Independent Fisheries
Association (SOKI)
Paul A. Shadura (spokesperson)

We adamantly oppose and
"artificial" escapement goal of
Kenai Late Run Large King goal
of 15,000 to 30,000. 15,000 OEG
has no scientific support from
the ADF&G. This was similar to
the "all king" goal of previous
plans and Large Kings are 60%
of the "in river" sonar.

We adamantly oppose: an inclusion
of the June 20th through June 30th
dates for the Kasilot section fishery.
There is no scientific justification
to include this timeframe in the
KRLR management plan. Large Kings
are minimally caught in this area prior
to July 1st.
