***Cordova District Fishermen United
2021 Board of Fisheries
Prince William Sound Meeting***

Record Copy: CDFU Shellfish Division

Enclosed are some photos showing the amount of golden king crab we encountered during the commissioners permit fishery for tanner crab, the king crab test fishery and subsistence fishing. We have seen ample evidence of golden king crab abundance.

The department has no assessment for Golden king crab in prince william sound and has shown no intention of developing a harvest strategy as they are being told to do by current regulation. Without board action we have no doubt this fishery will simply stay closed forever

King Crab caught subsistence
fishing
