---

To the Board of Fish,

I just found the information to give my opinion, which deadline was yesterday. I still insist you move this important event back to Ketchikan, as the fishing issues impact our southeast communities and as Indigenous people, our communities were preparing for your arrival and ready to host all of us who are invested in your decision making process. You are our voice! Ketchikan is part of our fishing areas, where the populations who care about this issue live.

Please consider us!
