

Proposal 41

A group of Setnet and Drift net fishermen that have many years of experience fishing this area. Have collaborated to generate a compromise proposal. We have generated a revised waypoint map to replace RC 55. The yellow line is assumed to be the outer limit of the current set gillnet fishing area. ie the position of the outside anchoring device of the existing legal setnets. The intent of this offset line is that it is 600 feet from the Ekuk Range marker to First Creek, 800 feet from 1st Creek to 3rd Creek and 1100 feet from 3rd to Etolin Point from the mean high tide line. On the revised map, the Waypoint line establishes the regulatory boundary. To assure our assumptions are accurate this will sunset at the next regular Bristol Bay Board of Fish meeting. The -3 foot reference in the current regulation is eliminated.
