

**PROPOSAL 151**

5 AAC 09.331 is amended to read:

**5 AAC 09.331. Gillnet specifications and operations.**

**Amend gillnet specifications and operations to allow offshore anchoring of seine web lead up to 25 fathoms on the shoreward end of a set gillnet, as follows:**

5 AAC 09.331. In the Unimak, Southwestern, South Central, Northern, and Southeastern Districts, 25 fathoms of seine webbing may be used on the shoreward end of a set gillnet. The lead must be retrieved when the set gillnet is hauled out of the water.

The intent of this substitute language is to include the Northern district in this proposal and align the language with Unimak, Southwestern, South Central, and Southeastern Districts.
