Board of Game Members:

I am not a hunter, I am an animal advocate. My goal is to preserve our natural world + all of its wonderful animals. I listened to many hunters at the meeting today asking for more liberal hunting proposals. People want more animals to hunt. Your job is to manage wildlife and to do that job correctly you will need to say "no" to more hunting. With Alaska's moose, caribou, sheep, wolverines, + bawuga whales populations down you have to stop hunting by the biggest predators humans to keep these animals from going extinct. You have not done a good job in many years because you do not protect wildlife from humans - you wrongfully kill bears + wolves to

over →

Compensate for humans over hunting.

Humans are the problem - human numbers are too high - they over hunt, they lie, they poach - they are greedy.

It is your job to protect wildlife from humans. If our animal populations, which they are ~~in~~ ^{in decline it is} because you are not doing your job protecting them from humans.

I suggest you end all hunting - except for subsistence - ~~not~~ out of state hunters allowed - no sports hunting - no Anchorage people allowed to hunt until our animals numbers are real high - like they were before humans goofed everything up. Remember Global Warming is coming & will make everything harder - another people caused problem. Stop the killing - preserve life. Get the \$ out of the system - it is just corrupting it.

Also NO to Proposal 150 - do not Kill Moose in Kincaid Park.

April Warwick
