As an Alaska Falconer I am against both Proposals 92 and 93. I don't think nonresidence falconers should have the same access to birds as the resident falconers have. This is a limited resource, do to the restricted access to much of the birds nesting habitate from the road system. Any additional competition would impact resident falconers access to birds.

I would also like to see no gyrfalcon eyasses take for nonresident, I imagine this is the AFC's main reason for submitting their proposal. I feel Gyrfalcon eyass take by nonresidents will only result, down the road, to nefarious actions by unscrupulous individuals.
