Excerpt of Delta AC Meeting minutes 3/16/2016

On March 16, 2016, The Delta Fish and Game Advisory Committee had their regularly scheduled monthly meeting at the ADF&G Office building in Delta Junction. Of the 15 seats, there were 9 members in attendance; Carl Taylor, Vern Aiton, Ross Baker, Jacob White, Jeff Lipscomb, Paul Dudgeon, Don Bunselmeier, Tim Webb, Don Quarberg.

Guests in attendance were Kurt Schmidt, Wildlife Trooper Arthur Cummings and ADF&G personnel in attendance were Brandi Baker, Bob Schmidt, and Darren Bruning (via teleconference).

The Delta Junction AC formally considered the following proposals:

PROPOSAL 92 - 5 AAC 92.037. Permits for falconry: Don Quarberg moved that the Delta AC support Proposal 92. Seconded by Vern Aiton. Discussion followed. VOTE: 0 in favor, 9 opposed, 0 abstained. Rationale: This is a conservation issue. The Delta AC believes that current laws and regulations, which already permit the taking of a limited number of passage birds by non-residents, is a reasonable approach to sustainable populations and harvests. Allowing additional harvest from nests, the locations of which are known and typically do not change from year to year, has potential to negatively affect populations of species which are highly sought after, like white Gyrfalcons and Peregrines.
