

Nonresident Sheep Registration

RC 078

Amend Proposal #34 to:

Nonresident hunts on State and BLM land will be managed on 3 registration hunts, with a quota based on the last 10 years average effort (similar the the boards current allocation policy) per GMU/subunit.

The quota will be split into three hunt periods. 20% of the quota will be taken the from the first ten days, 40% taken the second ten days, and 40% taken the remaindered of the season.

There are a few areas on state land that are problem areas and the quota should be decreased from the 10 year average in those areas.
