

RC 105

Dear Board of Game,

Please reject Prop 90 in any form. While I'm sure that [REDACTED] meant well with his modification to "pass with delay", he may not have realized that this put him in an incredibly powerful bargaining position with the ability to threaten the agricultural community for two years while having de-listment as the new status quo.

The incentive of this condition is for the ag community to work on the legislature for protection rather than address the potential problem of wild and domestic co-mingling. This means that more time will pass but the danger will not be abated.

We need a clear signal that we won't be under attack so that we can concentrate NOT on defense but on solving a problem. I do not want to be responsible for a mass die off of wild sheep and goats, I sincerely doubt anyone does. However, at the moment our attention is fixed on keeping our herds from being casualties and the "fight or flight" response is concentrated on "fight". For there to be constructive effort, we must diffuse this.

Thank you for your consideration,  
Jim O'Connor
