Dear Board Of Game,

I am writing to ask you to REJECT Proposition 90 and please **do not consider** the two year implementation as suggested by the WSF's Kevin Kehoe. His Proposal is a threat to the agricultural community and could be seen as quite self-serving without taking into consideration the impact on the quality of life for others involved. As written the proposal itself is flawed and far too vague, and includes too many unanswered provisions. Don't pass a flawed proposal that is based on poor public process and lack of involvement of all stakeholders. Don't pass a proposal that leaves so many issues and requirements unanswered. This proposal is once again an overreaching of government control. This reminds me of the Obama care plan and look at how well that is serving us.

This will cause the agricultural community to "fight" as our rights are under attack and would now move our focus to protecting ourselves and our freedoms instead of addressing the potential problem of wild and domestic co-mingling. This means more time will pass and unnecessary energy and funds spent on protection instead of removing the danger and allowing us to focus on a constructive cooperative plan taking both sides into consideration.

The agricultural community needs a clear signal that we are not under attack so that we can focus on a solution as opposed to focusing on protection of our rights. As a responsible citizen I think that wild and domestic goats both need to be considered and Proposition 90 does not do that.

Thank you for your time and consideration on this matter.
