

Note: This proposal was deferred from the 2017 Arctic/Western and Interior/Northeast Arctic Region meetings to the 2018 Central/Southwest Region Meeting. It was previously numbered Proposal 25 and Proposal 83.

PROPOSAL 147 – 5 AAC 85.025. Hunting seasons and bag limits for caribou. Open a nonresident draw hunt for caribou in Units 18 and 19 as follows:

Units 18, 19A, and 19B – Nonresidents:

One bull caribou by drawing permit September 1–30

What is the issue you would like the board to address and why? As of the drafting of this proposal, ADF&G states: "The harvest of Mulchatna caribou is well below sustainable levels." The Mulchatna caribou herd has started to grow and all indicators are that it is healthy. Unfortunately, it has recently resided predominantly in areas that are difficult to access. A nonresident hunt, limited by drawing should be well within the sustainability of this herd that is currently underutilized. I would suggest a limit of up to 50 tags and ask ADF&G to initially only issue 20 across the entire range of the herd. It is desirable to see this herd continue to grow. Communities within the region have had a difficult time taking the harvestable surplus due to the locations of the animals. Providing a nonresident hunt will result in light harvest and most meat will be left in the communities within the region as is the case in all remote nonresident hunting opportunities. This proposal is submitted for both the Arctic and Western (Unit 18) and the Interior and Eastern Arctic (Unit 19A and B) meetings. This proposal will also be submitted for Units 9 and 17 when in cycle.
