

## ANGUKSUAR QIURAN INSTITUTE OF CULTURAL & NATURAL RESOURCES

I am Alissa Nadine Anguksuar Qiuran Joseph Rogers, I come from a land of nomadic people that were forced to live a western lifestyle. To adapt to a government that was designed to push people off their lands for development. To live through painful degeneration of their identity. Through their pain and suffering, a small seed of hope was implanted in my soul to bring back the dignity of our people. Our investment proposition is to establish an:

Anguksuar Qiuran Institute of Cultural & Natural Resources, a non-governmental organization that will collaborate with:

Local, State, Federal, National & International governments

Centering the following programs:

- Natural Resources Research
- Education Development
- Establishment of Traditional & Cultural Data Retention; and
- Development of Laws & Regulatory Management

The Cost of development is \$307.5 Million dollars. That can be broken down into three phases:

Phase 1: Seed Money	\$990,000.00	2-years
Phase 2: Building Costs	\$300 Million	3-years
Phase 3: Research Costs	\$6.51 Million	10-years

The total of 15 year investment

Our Short Term Goal Outcomes will be:

- Creation of Comprehensive Plan to meet long term objectives
- Research plummeting resources to establish immediate management tools; and
- To Gain Trust, Loyalty, and Accountability

Our Long Term Goal Outcomes will be:

- Traditional & Cultural Knowledge Data Retention
- Establish Dignified Tribal Governance; and
- Revitalization of dead traditions

Closure:

- We all share the same dilemmas of loss to validate of our identity. A belief in our independence to govern our own. Through your investment I, as a First Nations Alaska Native Ambassador and Congressional Delegate. I can see our dreams and visions of independence come true. My promise is to deliver our identity back to the people for them to govern. Through your investment we can plant the seed for our future generation. To advance our interests for a better future that they can value. A value that I dearly believe in. That I made the first contributions to the Stanford Development Fund. I thank you for your time and hope to advance our partnership.
