

To who it may concern

I am from Scammon bay Alaska, during the winter we pick moose antlers that shed off. This gives many of us a boost of income during the cold winters. Many people dont have jobs and this is a great source of income that can last a few months before commercial fishing starts. We hunt what we see we do not hunt giant moose for money they dont taste as good as small bull moose.

Proposal 13 should be eliminated and opposed
