Comment to BOG regarding proposal 23 Positioning a wolverine:
from Dan Dunaway Secretary of Nushagak AC

I offer this suggestion purely as a private personal comment. I am not speaking for the AC on this suggestion:

23 I support this proposal. I offer this language to clarify what positioning means. I support this proposal as this technique is already allowed in other GMUs of Alaska and more accurately reflects the traditional activity involved in the taking of wolverines in much of western Alaska. :

to position:

to maneuver or operate a snowmachine so as to follow or guide a wolverine to a location where a shot can be made on the animal.

This would not include physically running over an animal or hitting or injuring or killing the animal with the snowmachine in any way.
