

PROPOSAL 102

5 AAC 92.990. Definitions.

Establish a definition for “primitive weapons” to include crossbow, longbow, shotgun, and muzzleloader as follows:

Primitive weapons include: crossbow, longbow, shotgun, and muzzleloader. These are the four primitive weapons as described in the lower 48 states. Alaska is a state just as they are and we need to change our primitive weapons description to meet the same. It will be less confusing for people from the lower 48 when they come to Alaska to hunt in a special weapons hunt.

What is the issue you would like the board to address and why? Change definition of hunts from archery/muzzle loader to primitive weapons.
