

PROPOSAL 148

5 AAC 92.550. Areas closed to trapping.

Require 100-yard trapping setbacks from known multi-use trails in Unit 7 as follows:

I propose that traplines need to be set up, say 100 yards from known multi-use trails.

What is the issue you would like the board to address and why? I live in Seward. Last winter on popular trails in the area, trappers were setting up traplines directly on the side of trails. I understand that this is not illegal but they are catching people's dogs on these trails and causing quite a bit of user conflict.
