

PROPOSAL 63

5 AAC 85.020. Hunting seasons and bag limits for brown bear.

Lengthen the brown bear season in Unit 6D, excluding Montague Island as follows:

Brown/Grizzly Bear:

Resident and Nonresident

Unit 6D Remainder: One bear every four regulatory years

Oct. 1 – May 25

What is the issue you would like the board to address and why? Lengthen the brown bear season in Unit 6D, except Montague Island as follows: October 1 through May 25. Changing the season opening would align with the opening of doe (antlerless) deer season. General public would be able to harvest a bear legally, instead of DLP (Defense of Life or Property) or unreported take during brown bear confrontations while black-tailed deer hunting.
