

Alaska Board of Game,

Please re-consider the recent non-resident limit of one deer on Kodiak Island. I do understand the residents concern and believe that residents should have more opportunity than non-residents. However there are other ways that that opportunity can still be given to the non-residents without as much impact on the animal populations. Archery and even traditional archery is being used in other states to allow more opportunity for hunters. It would be very easy to keep the 3 deer bag limit for Archery and limit the non-resident rifle to one deer. This would still allow more opportunity and have less effect on the local guiding and outfitting economy.

Thank You

Bob Bourland
