

Would you please vote to reconsider proposal 147.

The Amendments & maps that were submitted and on file were not considered in discussion with possibilities of further amendments.

There was substantial public comment in support of this issue. This is a very important issue to the Homer community with support from local trappers.

Note: #147 amendment & recommended new language is located: PC 291

**We are open to more amendments from The BOG to make this work for the Homer Community.**

Again - we are working with and have the support of several local trappers, one of them is also an author on this proposal.

The trails on these maps are mapped and sold as paper maps and available online and have not changed in many years.

These are the most popular public trails are GPS mapped.

Priority trails would be:

1. Watermelon Trail (multiuse)
2. McNeil KNSC Ski trails (or just the Wolf Ridge trails at McNeil)
3. Marathon KNSC Connector Trail
4. McNeil Canyon (multiuse) trail

Thank you for your time,

an author of #147
