

The Alaska Fish & Game emergency request to adopt the Mulchatna bear control program is wrong, please do not adopt it. I oppose the States RC009 (emergency regulation) because this is NOT an emergency and this bear program was already found to be unlawful. Nothing has changed since the ruling was found to be unlawful and the State has not assessed the impact to bears. The public should be notified and they are trying to illegally go around the process. Do not allow this cruel and illegal program to continue this year. Thank you,
