

PROPOSAL 175

5 AAC 85.045(5). Hunting seasons and bag limits for moose.

Reauthorize the antlerless moose season in the Twentymile/Portage/Placer hunt area in Units 7 and 14C.

Seasons and Bag Limits	Resident Open Season (Subsistence and General Hunts)	Nonresident Open Season
-------------------------------	---	------------------------------------

(5)

...

Unit 7, the Placer River drainages, and that portion of the Placer Creek (Bear Valley) drainage outside the Portage Glacier Closed Area, and that portion of Unit 14(C) within the Twentymile River drainage

RESIDENT HUNTERS:

1 moose by drawing permit only; up to 60 permits for bulls will be issued in combination with nonresident hunts, and up to 70 permits for antlerless moose will be issued

Aug. 20—Oct. 10
(General hunt only)

...

NONRESIDENT HUNTERS:

1 bull by drawing permit only; up to 60 permits for bulls will be issued in combination with resident hunts

Aug. 20—Oct. 10

...

What is the issue you would like the board to address and why

Antlerless moose seasons must be reauthorized annually, and the Alaska Department of Fish & Game (department) recommends reauthorizing the antlerless hunt in Units 7 and this portion of 14C. The moose population in the Twentymile/Portage/Placer area has a history of rapid increase

following mild winters and sharp reductions during severe winters. In 2009, antlerless permits were issued for the first time since 2004. The number of permits issued depends on the current population estimate, bull:cow ratios, and estimated winter mortality. A November 2024 aerial composition count of moose in the Twentymile, Portage and Placer River drainages found 203 moose with a bull:cow ratio of 33 bulls per 100 cows and a calf:cow ratio of 30 calves per 100 cows.

The harvest of antlerless moose provides the department with a management tool to maintain the number of moose in the Twentymile/Portage/Placer area at an abundance level that reduces the possibility of over-browsing of winter habitat, moose-vehicle collisions, and significant mortality events during severe winters. This hunt, in previous years, has been successful in creating additional moose hunting opportunity with little or no controversy among resource users.

Did you develop your proposal in coordination with others, or with your local fish and game advisory committee?
