Also post, ask legislation to build us a building in Anchorage for our meeting and this will end all the stupid costs. We could get a service for coffee, tea and water. It will be where the people are or have to fly into for meetings. They could build it with rooms above the meeting hall and house the board members and staff.

Glenn, how about talking to the governor about defunding the Mat-Su Fishing Commission and put that money into the BOF/BOG budget.

I don't know how or why this commission was formed. Yes they do a lot of good BUT if they were to focus that energy on our cause instead of working against us we would be better off. Most of the people on that board are old AC members or current members on the Mat Valley AC. We don't need two different committee's doing the same thing. They are getting the money we were cut.
